

CONCEPTS COVERED: Scales

STUDENT LEVEL: Early intermediate/grade 2

SCALE ENGINEER

SCALE ENGINEER

HOW TO PLAY

- Place a keyboard board and 8 tokens in front of each player.
- Players take turns to pick a card at random and place one of their tokens on their keyboard board.
- Once all their tokens have been placed, they can choose to move an existing token on each turn – or pass.
- Players can move a token to the same note in a different octave at any time.
- The winner is the first to create any major scale (or other type of scale at teacher's specification) with their tokens.

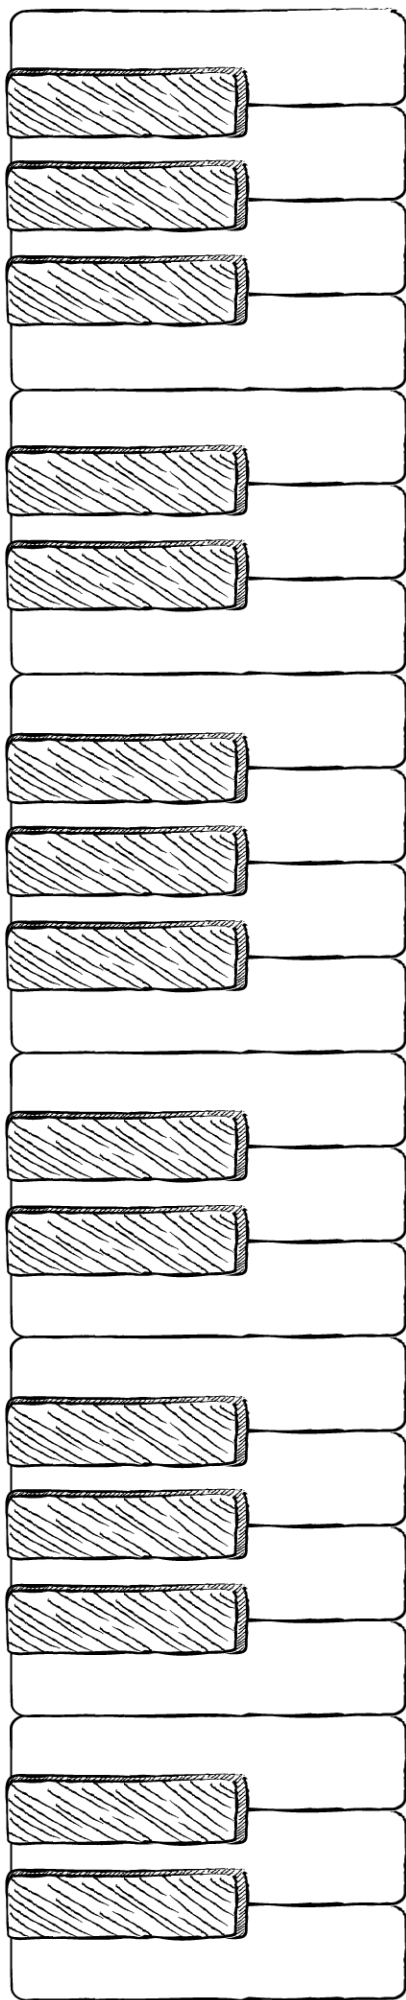

ASSEMBLY

To assemble this game:

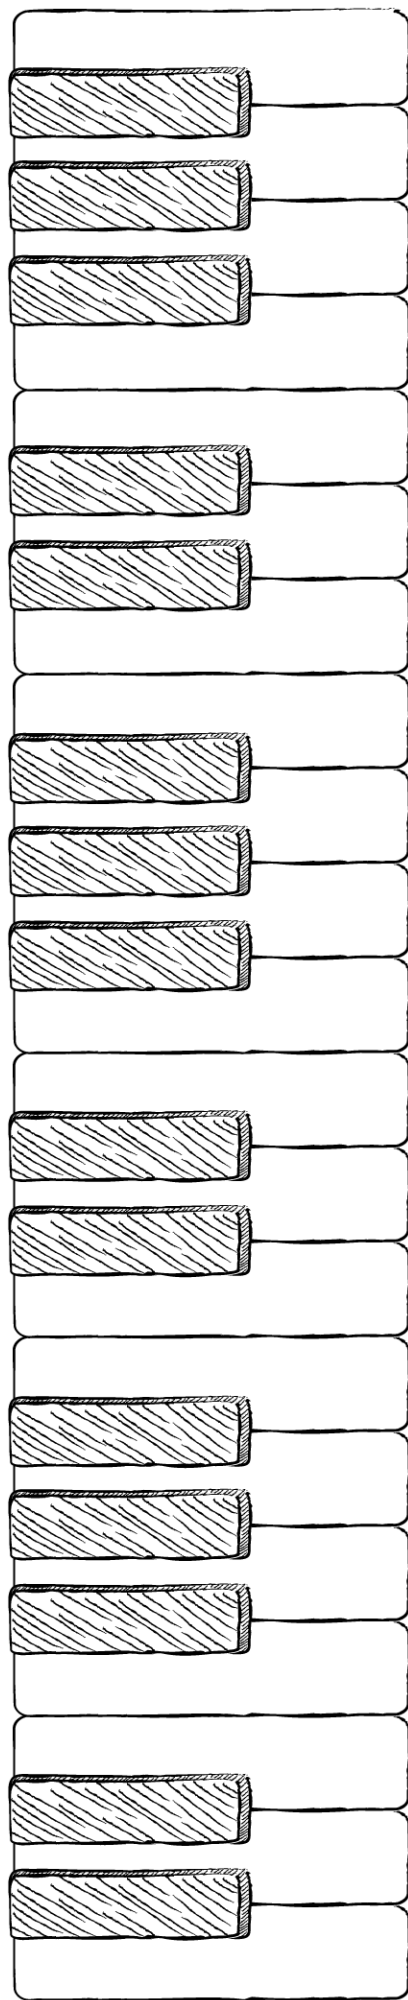

- Print out the keyboard boards (pages 3-5). Cut apart the cards along the dotted lines and laminate if desired.
- Print out the game cards (pages 6-9) double sided. Cut apart the cards along the dotted lines and laminate if desired.
- You will also need 8 tokens (erasers, buttons, small toys, etc.) for each player.

LEARNING OBJECTIVES

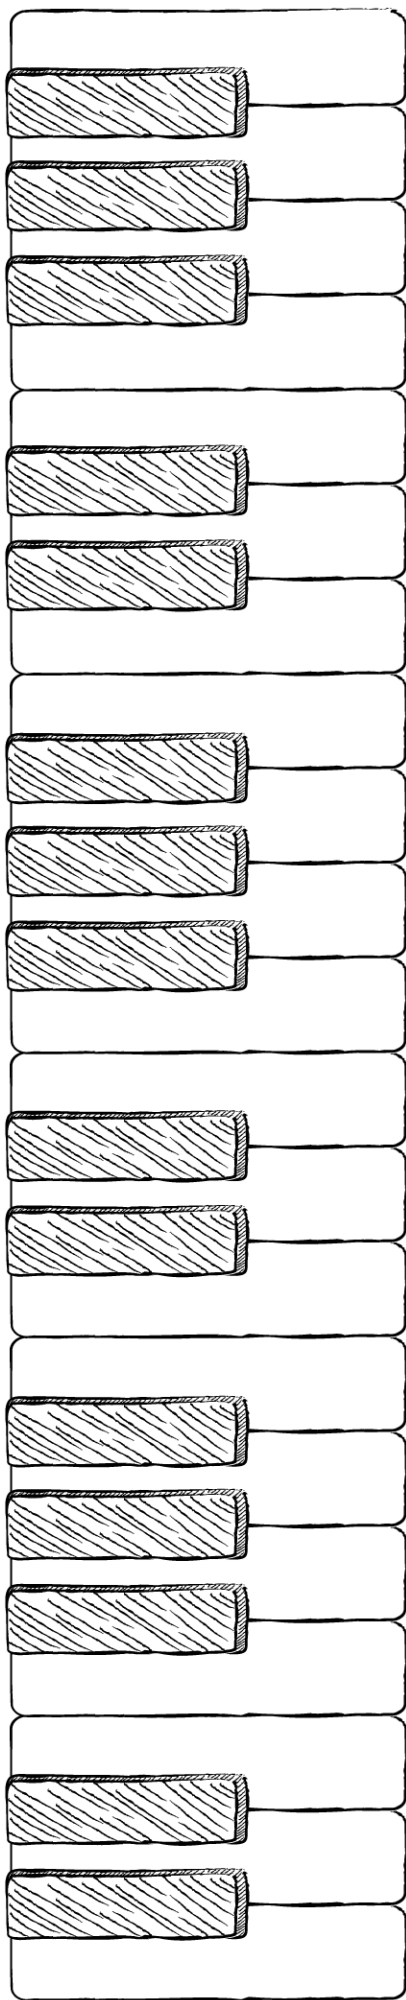

Scale Engineer focusses on the visual patterns of scales on the keyboard. This helps students to remember their scales, and to recognise these patterns when they come up in repertoire.
